

Put it out with **water**

A campfire with bright orange and yellow flames is shown. A large, stylized blue water splash graphic is overlaid on the fire, with several blue droplets falling from it. The background is a solid blue color.

- ✓ Put out a campfire with water
- ✗ Sand or dirt leaves hidden hot coals for hours
- ✗ Hot coals cause horrific burns
- ✓ Water makes a 500°C campfire safe in 10 minutes

Have a great camping holiday!

When camping...

- ✓ **PUT** the fire out with water.
- ✗ **NEVER** leave campfires unattended.
- ✗ **NEVER** cover campfires in sand or dirt or allow them to 'burn out'.
- ✓ **TREAT** burns with cool running water for 20 minutes and seek medical help.
