

Play the EGG Game!

1

- Teachers show the difference between an egg (representing a head) hitting the ground without a helmet on. Teacher's need to have hard boiled eggs, raw eggs and some polystyrene to mimic a helmet on the egg.

2

- A raw egg is dropped onto concrete showing what happens when a head hits the concrete, unprotected. The egg cracks and is a reminder of what can happen to the child's head.

3

- A hard-boiled egg or egg with a polystyrene helmet wrapped around it, is dropped onto concrete and the students see first hand that it doesn't crack - you don't shatter your skull!
