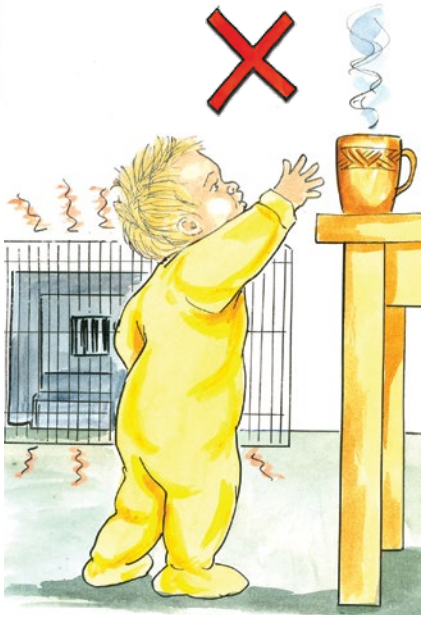
BURNS IN THE HOME

Kidsafe Qld Inc
Original developed by Kidsafe Victoria and the Victorian Department of Health



- Hot water burns like fire
- Check the temperature of the bath water using a thermometer before putting little ones in. A safe temperature for bathing a bub is 37–38°C (36°C for a newborn)
- Keep hot drinks and food out of reach and never hold these when nursing or carrying little ones
- Use a gate to help stop little ones going into the kitchen when adults aren't around
- Install smoke alarms and regularly check that they are working by testing the batteries
