CAR SAFETY

Kidsafe Qld Inc
Original developed by Kidsafe Victoria
and the Victorian Department of Health

- Make sure all little ones are buckled up every time you get in the car
- Keep your child in the right seat for their size. The shoulder height marker will tell you when they are big enough to change seats
- Children must sit in the back – this is the safest spot for them
- The seat needs to be fitted in the car correctly – if you aren't sure, you can book in for a free check at **safeseatssafekids.com.au**
- Every time you put your little one in their seat, check that:
  - The seatbelt is buckled up
  - The top tether strap is connected and not twisted or too loose
  - The harness straps aren't twisted or too loose

CAR SAFETY

- ✓ Never leave children alone in a car – it can get really hot and make them sick
- *i* It can be hard to see little ones when reversing in your driveway. To keep them safe:
  - ✓ Find a safe place for them to play away from the driveway
  - ✓ Hold your little one's hand when near the driveway, especially when a car is driving in or out
  - ✓ Walk around the car and check before reversing
